

JUTEL RadioMan™ Express

The new RadioMan Express makes RadioMan affordable to any radio station

RadioMan Express is a full-featured radio automation system in an easy to install package for 3 to 8 workstations.

Complete, proven solution for all radio formats

Jutel RadioMan is more than an ordinary automation system - it is an **end-to-end solution that handles the entire workflow of the radio station**, from scheduling to broadcasting. All basic functions are built into one system, which ensures reliable operation and a low-maintenance working environment.

It is suitable for any radio format: music, talk, sports, news, mixed...you name it, RadioMan does it!

World leading broadcasters use RadioMan - join the team!

World leading broadcasters use RadioMan as their core system for radio production, broadcasting and content management. Just to name a few: BBC, RTE, ERTU, CBS News and Finnish Broadcasting Company have all been using RadioMan for years.

Now this World Class solution is affordable to all radio stations.

Versatility at Work

By providing new possibilities and ways to make programmes, effective material sharing, easy reuse of content and shorter production time, Jutel RadioMan enables broadcasters to increase productivity and to broaden the range and quality of the services offered.

RadioMan offers easier workflows and increased flexibility for journalists and producers alike, while providing technical personnel a system that is robust and easy to maintain.

RadioMan's native UniCode support enables users all over the world to produce content and use RadioMan in their native language.

The solution grows with Your needs

You can have a quick start with RadioMan Express packages starting from three workstations and expand it whenever needed. RadioMan scales up as much as you will ever need!

Jutel - over 26 years excellence on-air!

Jutel Ltd., founded in Finland in 1984, is one of the oldest and most experienced suppliers of radio automation and digital radio broadcast solutions in the world. Jutel provides the best and most innovative solutions for managing media assets, radio workflow and radio broadcasting content on various delivery channels.

Jutel's RadioMan solutions are results of continuous software development since the beginning of 90's and Jutel's over 25 years experience in radio broadcasting technology.

The combination of professional software, hardware, services and good local partners results in a radio station solution that is easy to install and robust in use.
