JUTEL RADIOMAN™
Workgroup Edition

The World-Class Radio Broadcasting Solution for Any Radio Station

Premium Quality for All Radio Formats

Jutel RadioMan Workgroup Edition is a unique and complete broadcast content management solution for small to medium radio stations. The combination of software, hardware, services and Jutel's 20 years of expertise results in an easy-to-install and easy-to-use total radio station management package.

The Solution Grows with Your Needs

You can have a quick start with the basic package and expand it when needed. Jutel RadioMan Workgroup Edition is suitable for any radio format: music, talk, sports, news, mixed...you name it, RadioMan does it - from one radio station systems to national radio networks.

Versatility at Work

By providing new possibilities and ways to make programmes, effective material sharing, easy reuse of content and shorter production time, Jutel RadioMan enables broadcasters to increase productivity and to broaden the range and quality of the services offered.

RadioMan offers easier workflows and increased flexibility for journalists and producers alike, while providing technical personnel a system that is robust and easy to maintain.

Ensure the competitiveness of your radio station now and in the future with Jutel RadioMan Workgroup Edition!

Managing the Broadcast Workflow

Jutel RadioMan Workgroup Edition is more than an ordinary automation system - it is an end-to-end solution that handles the entire workflow of the radio station, from scheduling to broadcasting. All basic functions are built into one system, which ensures reliable operation and a low-maintenance working environment.

Industry Standard Technology and Global Language Support

RadioMan is built on open architecture and industry standards, providing an unparalleled combination of scalability, suitability to different operational environments, integration capability and compatibility with future technologies. RadioMan's native UniCode support enables users all over the world to produce content and use RadioMan in their native language.

Redefining Radio Broadcasting

The future is for those who seize the opportunities offered by new media channels. Jutel RadioMan provides a broad range of ready-to-use tools for going beyond conventional radio: synchronous text, picture and HTML information flow for DAB, Internet, radio on DVB and the revolutionary Visual Radio for mobile phones.

Customer Reference

Jutel RadioMan has made Sky-High the most digitalised radio broadcasting organisation in Thailand. The solution was configured to suit Sky-High's needs and the needs of the Thai radio broadcasting environment; Jutel's vision of the future of digital broadcasting technology fits the Asian market

"Jutel RadioMan is the perfect integrated digital radio management solution, providing us a flexible and comfortable workflow. Although Sky-High totally moved away from an analogue environment to all digital, my DJs and staff enjoy operating it."

Furthermore, I also found its features and capabilities, which were exclusively configured for Sky High, went beyond what else was easily available. The performance is excellent; it works in a very competent way in a DJ-based radio station like Sky-High."

Surachat Tangtragool
Managing Director,
Sky-High Network
